OFFLINE MCQ BASED EXAMINATION SYSTEM USING VB.NET

Diploma of Computer Engineering, 2021

- Developed a user-friendly offline examination system for administrators, staff, and students.
- Implemented features like user registration, login, test creation, and result analysis.
- Enhanced the system with features like automated test generation and performance analysis.

SUSPICIOUS ACTIVITY DETECTION USING CNN

Bachelor of Computer Engineering 2024

- Developed a computer vision-based system to detect suspicious human behavior in CCTV footage.
- Trained a Convolutional Neural Network (CNN) model on a dataset of normal and suspicious activities.
- Achieved high accuracy in detecting anomalies and generated real-time alerts.

Achievements

ACADEMIC EXCELLENCE

I have consistently excelled in my academic pursuits. I graduated with a Bachelor of Computer Engineering from the College of Engineering, Manjari(Bk.), with a GPA of 7.90, and a Diploma of Computer Engineering from the Samarth Group of Institutes, Belhe, with a score of 91.89%.

TECHNICAL PROFICIENCY

I am proficient in various programming languages and technologies, including Java, C, SQL, VB.Net, and web development skills using HTML, CSS, and JavaScript. I have successfully implemented these skills in projects such as the offline MCQ examination system and the suspicious activity detection system using CNN.

PROBLEM-SOLVING SKILLS

I am a strong problem solver with a creative approach. I have successfully tackled complex challenges and developed innovative solutions. My work on the suspicious activity detection system using CNN demonstrates my ability to apply machine learning techniques to real-world problems.
